Title: An Inconvenient Truth Screening at Meeting House

On Wednesday, October 4th at 7:00 pm the Meeting House of First Congregational Church will host a free screening of the widely popular documentary An Inconvenient Truth starring former Vice President Al Gore.

The third highest grossing documentary to date in the US, An Inconvenient Truth presents the dangers of climate change, in particular global warming, and offers positive measures to combat this threat to our environment.

Seattle reviewer William Arnold commented, "It's a mind-boggling disaster epic that draws its special power from the fact that we are both the villains and victims of the story."

The film will be viewed on the Meeting House's new projection screen.

"The motion picture gives us a memento mori a reminder of death that heightens a sense of urgency as we are called to respond to our environmental crisis. Second, it offers a memento dei an awareness of the holy that is contained within creation," shared Berry.
